

Cogent Communications Comes to FIBERTOWN's Bryan Data Center, Offering Enhanced Connectivity Options

FIBERTOWN and Cogent provide reliable, low-latency connectivity for customers in the region.

FOR IMMEDIATE RELEASE

BRYAN, TX – FIBERTOWN, a Texas-based carrier neutral data center and colocation center, now has connectivity services offered by Cogent Communications, one of the world's leading Internet and Ethernet service providers.

With this expansion, Cogent extends its services to the Bryan Data Center, complementing its existing presence in FIBERTOWN's Houston Data Center. This means, all FIBERTOWN customers can directly connect to Cogent's high-performing network, benefiting from its reliable, low-latency connectivity solutions.

"We're always looking for ways to serve our customers better," states Matt Kriger, FIBERTOWN's Strategic Client Success Manager. "And this gives FIBERTOWN even more of a worldwide presence due to Cogent's network. Cogent is one of the top 5 providers globally and in over 1,600 data centers around the world. Cogent provides services in 251 markets in 54 countries. We know having them built into both of our data centers is the right move for everyone – for our customers who want reliable, fast connectivity and for FIBERTOWN and Cogent, who are always looking to serve even more businesses."

FIBERTOWN's Bryan Data Center, known for its state-of-the-art infrastructure and unrivaled customer service, is the only data center located in the heart of the Texas Triangle, the region containing Texas's largest cities. By Cogent extending its services to the Bryan Data Center, Cogent further strengthens its network infrastructure and provides more resilient connectivity options to this region.

We're excited to announce this extended relationship between Cogent and FIBERTOWN. It brings together two industry leaders to deliver exceptional connectivity.

About FIBERTOWN

FIBERTOWN is a trusted leader in colocation data centers, disaster recovery, and business continuity office space. Texas owned and operated since 1997, FIBERTOWN maintains data centers with concurrent and redundant power, cooling, and connectivity, as well as disaster recovery offices in north Houston and Bryan, Texas.
